

# ECOMTCP

Enhanced Construction Managers' Training and Certification Program

The ECOMTCP is the product of an industry-led application of lessons learned from the pilot construction project management program of CMDF—the COMTCP.

Basically, it endeavors to address the drawbacks and limitations of the previous program (i.e. marketability, alignment to local education standards)

## PROJECT OBJECTIVES

1. Introduce a training and certification program that upholds rigorous construction project management standards, and is reflective of the current practices of the discipline;
2. Introduce a training and certification program that can raise the competitive advantage and expand career advancement opportunities of construction project managers through highlighted competency, and increased visibility and global mobility;
3. Introduce a training and certification program that is committed to professional development;
4. Strike a balance between global eminence (conformity to international standards) and local relevance; and
5. Provide impartial and credible means to validate domain knowledge and professional experience related to construction project management.

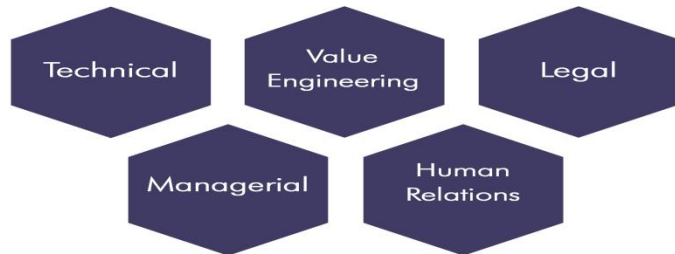

## LEARNING OBJECTIVES

CMDF-certified construction project managers should be able to:

1. Apply internationally-recognized project management standards and best practices to construction projects;
2. Successfully execute construction projects, from initiation up to closure, while maintaining quality, budget, schedule, and safety requirements;
3. Practice informed decision-making throughout the project life cycle; and
4. Maintain high ethical standards in dealing with construction staff and all stakeholders in the construction process.

## CORE MODULES

## ELECTIVE MODULES

## ELIGIBILITY AND OPTIONS

CREDENTIALS	Zero Construction Project Management (CPM) experience	At least 3 years of CPM experience within the last 8 years	PMP ® Certification holder
RECOMMENDED PTP OPTIONS	Take all the core modules and the exam preparation module	Take the exam preparation module	Can skip the Managerial and Human Relations modules

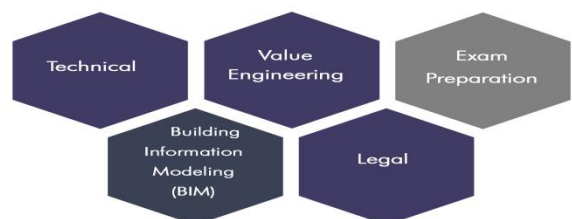

## PERSONALIZED TRAINING PROGRAM (PTP)

A module-based training program that is adaptive of the applicant's knowledge, professional experience, and learning preference.

Although the training component of the program is not mandatory, it is recommended, as the certification examination would comprehensively cover all the construction project management concepts from the core modules.

## CREATE YOUR OWN PTP

sample:

The core and elective modules allow for flexibility as regards to time, finances (course fee), and interests.
